PROFESSIONAL SUMMARY

Electronics & Telecommunication Engineering student with a strong academic background (**9.09 CGPA**) and practical experience across software development, embedded systems, IoT, and robotics. Skilled in C, C++, Python, Java, ESP32, Arduino, and SQL with hands-on exposure through technical projects, internships, and leadership roles. Highly analytical, adaptable, and eager to leverage hardware-software integration capabilities to build real-world engineering solutions.

WORK EXPERIENCE & TRAINING

PHN Technology Pvt Ltd

IoT & Robotics Intern (*Paid Internship*)

3-Month Internship

- Apply hands-on engineering principles to build, test, and troubleshoot smart automation systems and robotics prototypes.
- Assist in microcontroller circuit design, sensor interfacing, hardware debugging, and real-time data collection.

Java Full Stack Trainee

- Gained hands-on technical foundation in front-end web technologies and relational database integration using Java stack.

Green Skills & AI Trainee

- Explored core Artificial Intelligence algorithms alongside sustainable technology practices and real-world deployment frameworks.

TECHNICAL SKILLS

Programming Languages	Python, C, C++, Java, JavaScript, HTML, SQL
Embedded & IoT	Arduino, ESP32, MQTT, Sensors Interfacing, Microcontrollers, Digital Electronics
Software Tools & IDEs	VS Code, Arduino IDE, MATLAB, KiCad, Git & GitHub
Core Engineering Domains	Embedded Systems, IoT Architecture, Robotics Systems, Firmware Development, Hardware Prototyping

TECHNICAL PROJECTS

AI-Based Smart Vehicle Safety & Health Monitoring System

Tech Stack: ESP32, Wearable/Health Sensors, GPS Module, Cloud/Mobile Technologies | [GitHub Repository](#)

- Engineered an IoT safety system integrating ESP32 and vital sensors to monitor real-time vehicle health and health parameters while detecting collision impacts.
- Designed automated SOS emergency response workflows, integrating AI algorithms to instantly locate and recommend nearest medical facilities.

Health and Safety Wrist Band for Women

Tech Stack: Microcontrollers, Biometric/Health Sensors, GPS, IoT, C/C++ | [GitHub Repository](#)

- Developed a wearable emergency system featuring real-time health parameter tracking and instant trigger-based emergency alerts.
- Engineered firmware for sensor integration and location transmitting via custom micro-controller code.

RFID-Based Automated Attendance System

Tech Stack: Arduino, RFID Modules, Arduino IDE, VS Code

- Developed an automated user identification and logging system using Arduino microcontroller and RFID authentication cards.
- Wrote firmware for sensor communication, data parsing, and user verification.

CERTIFICATIONS

- **Data Analytics with AI** – SoloLearn (2026)
- **Introduction to Java** – SoloLearn (2026)
- **Fundamentals of Cybersecurity** – UpGrad
- **Python Using AI Workshop** – AI For Techies
- **Java Full Stack Certification & Green Skills and Artificial Intelligence Certification**

EDUCATION

B.E. in Electronics & Telecommunication Engineering

KJ College of Engineering and Management Research (KJCOEMR), Pune (SPPU)

CGPA: 9.09 / 10

Exp. 2027

Higher Secondary Certificate (HSC - 12th)

Maharashtra State Board

69.33%

2023

Secondary School Certificate (SSC - 10th)

Maharashtra State Board

91.80%

2021

ACHIEVEMENTS & LEADERSHIP

- **ATVC 2026 Participant:** Selected to participate in the national event held in Ahmedabad, Gujarat.
- **NLPC 2026 Participant:** Presented technical innovation projects at KJCOEMR.
- **IETE Coordinator & Volunteer:** Honored with Certificates of Appreciation as Student Coordinator (NLPC-25) and Student Volunteer (NLPC-26) by IETE Pune Centre.
