Introduction

Motivated third-year Electronics and Telecommunication engineering student (9.0 CGPA) with a strong foundation in Java and Python. Actively expanding expertise in software development and backend engineering. Passionate learner eager to apply technical and problem-solving skills in a dynamic software engineering role. Possesses a solid understanding of core E&TC subjects and enjoys creative pursuits like painting and singing to naturally foster balance and creativity.

Projects

BlockPay – Crypto + UPI Payment dApp | *React.js, Solidity*

June 2025 (Hackathon)

- Built a decentralized payment app supporting both Ethereum and UPI-based transactions to facilitate seamless integrations.
- Focused fully on frontend development, designing an intuitive UI and building cross-platform responsive web components.
- Integrated MetaMask for wallet authentication, smart contract interaction, and real-time balance updates.

CO2 Emission Prediction | *Python, AI, ML, OpenCV*

January 2026

- Analyzed traffic videos using OpenCV to detect moving vehicles and extract traffic features such as vehicle count over time.
- Used collected features to reliably calculate real-time CO emissions corresponding to standard emission factors.
- Trained a Linear Regression model to firmly predict future CO emissions, enabling detailed transportation carbon footprint analysis.
- Engineered a low-cost, scalable, and vision-based solution targeting broad traffic pollution monitoring and smart city planning.

Relevant Coursework

- Data Structures
- OOPs
- Arduino Technology
- Artificial Intelligence

Education

Savitribai Phule Pune University

July 2023 – August 2027

Bachelor of Technology in Electronics And Telecommunications

Pune, Maharashtra

9.0 CGPA

Technical Skills

Languages: Java, Python, SQL (DBMS)

Developer Tools: Arduino IDE, VS Code, Antigravity

Technologies/Frameworks: AI/ML, React.js, OpenCV, GitHub

Leadership / Extracurricular

IEEE Student Council Member

2025 – Present

Member

KJCOEMR

- Actively participating in organizing technical events, workshops, and seminars for the student branch.
- Collaborating with peers and professionals to foster technical and professional development within the engineering community.

College In-House Hackathon

2025

Participant

KJCOEMR

- Participated in the college in-house hackathon, where we presented the BlockPay Crypto + UPI Payment dApp.
- Collaborated with teammates to design and develop the dApp
- Selected for the next stage of the competition due to strong project execution and presentation.
