Introduction

Final-year Electronics and Telecommunication Engineering student with a 9.0 CGPA and hands-on experience in React.js, HTML, CSS, and JavaScript. Builds responsive, user-friendly web interfaces and reusable components. Combines frontend project experience with an embedded development internship and seeks to contribute to a collaborative software team as a frontend developer.

Experience

Embedded Developer Intern

June 2026 – Present

PHN Technology Pvt. Ltd.

Pune, Maharashtra

- Develop embedded applications using ESP32, Arduino, and embedded C/C++ for IoT and automation projects.
- Integrate sensors, actuators, and UART, I2C, SPI, BLE, and MQTT communication for real-time embedded systems.
- Debug firmware, test hardware interfaces, and troubleshoot embedded applications to improve system reliability.

Projects

BlockPay – Crypto + UPI Payment dApp | React.js, Solidity, MetaMask

June 2025 (Hackathon)

- Led frontend development for BlockPay, building a responsive interface for Ethereum and UPI payment workflows.
- Built reusable React components and integrated MetaMask for wallet authentication and real-time balance updates.
- Optimized layouts across devices to deliver a consistent, intuitive user experience.

CO2 Emission Prediction | Python, OpenCV, Machine Learning

January 2026

- Analyzed traffic videos with OpenCV to detect vehicles and extract features for CO2 emission estimation.
- Trained a linear regression model to predict CO2 emissions and support transportation carbon footprint analysis.
- Developed a vision-based approach to traffic pollution monitoring and smart city planning.

Education

Savitribai Phule Pune University

July 2023 – August 2027

Bachelor of Technology in Electronics And Telecommunications

Pune, Maharashtra

9.0 CGPA

Technical Skills

Frontend: React.js, HTML, CSS, JavaScript

Languages: Java, Python, SQL

Tools & Platforms: Git, GitHub, VS Code, Arduino IDE

Technologies: REST APIs, AI/ML (basics), OpenCV

Relevant Coursework

• Data Structures

• OOPs

• DBMS

• Artificial Intelligence

Leadership / Extracurricular

IEEE Student Council Member

2025 – Present

Member

KJCOEMR

- Help organize technical events, workshops, and seminars for the IEEE student branch.
- Collaborate with peers and professionals to support technical learning and professional development.

College In-House Hackathon

2025

Participant

KJCOEMR

- Presented BlockPay, a Crypto + UPI payment dApp selected for the next stage of the competition.
- Served as the primary frontend developer, designing the full interface and refining the user experience.
